ErrandBuddy

"Your Everyday Helper, Every Step of the Way"

WHO WE ARE?

WHY?

People need assistance with daily errands and tasks,
but reliable help is often hard to find,
causing stress and wasted time.

WHAT?

ErrandBuddy is an innovative platform
that connects users with reliable and vetted errand runners.
It's a one-stop solution for all errands,
providing convenience and peace of mind.

HOW?

Using advanced technology and a user-friendly interface,
ErrandBuddy matches users with the perfect errand runner
based on their needs and preferences.
It's a subscription-based service,
allowing users to effectively delegate tasks
and regain control of their time.

	Anurag Pratap Singh	Tech Lead	Leading the technical development of our platform
	Naman Kumar Rai	Marketing Lead	Spearheading our marketing efforts
	Ravi Vinayak	Project Manager	Overseeing the project's execution.

Problem Statement

The problem that we identified as worth solving is that people struggle to find reliable and efficient assistance for their daily errands and tasks, leading to wasted time, stress, and inconvenience.

We found that approximately 75% of the customers that we interviewed are facing this problem.

Currently, they are managing this problem by either attempting to handle all errands themselves, which can be overwhelming and time-consuming, or relying on unreliable sources such as ad-hoc help from friends or family, which may not always be available or suitable for the task at hand.

Solution

We propose to introduce ErrandBuddy, an innovative solution designed to alleviate the challenges associated with finding reliable and efficient assistance for daily errands and tasks.

Currently, individuals are struggling to manage their errands due to a lack of dependable support. They either attempt to handle everything themselves, leading to overwhelming stress and wasted time, or rely on unreliable sources such as friends or family, which may not always be available or suitable.

ErrandBuddy aims to address this problem by connecting users with vetted and reliable errand runners through a user-friendly platform. Users can easily request and schedule errands, ranging from grocery shopping to parcel delivery, with the assurance of timely and efficient service.

Our solution will benefit customers by saving them valuable time, reducing stress, and providing convenience and peace of mind in managing their daily tasks.

Customer Persona

Name: Aisha Patel
Age: 28
Location: Urban area, Mumbai, India
Role: Marketing Executive at a digital marketing agency

Solution Demo – Product/Service

DEMO/ DESCRIPTION

- ErrandBuddy: Web platform for errand assistance.
- Users create tasks, specify details, and set completion times.
- Matches users with vetted errand runners for various services.
- Real time tracking and communication with assigned runners.
- Feedback system ensures service quality and reliability.

LEARNINGS

- Convenience in outsourcing errands.
- User friendly interface enhances accessibility.
- Real time tracking improves transparency.
- Feedback system maintains service quality.
- Insights drive continuous platform optimization.

Prototype/MVP

DEMO/ DESCRIPTION

- Developed a website prototype for ErrandBuddy, to showcase core features and functionality.
- Website allows users to sign up, request and schedule errands, and connect with vetted errand runners.
- Demo includes user-friendly interface, seamless navigation, and basic functionality to simulate user experience.
- Key features demonstrated: user registration, errand request submission, and matching with errand runners.

LEARNINGS

- Identified the importance of user experience and interface design in enhancing usability.
- Learned about user preferences and pain points through user testing and feedback sessions.
- Discovered the need for robust backend systems to support user registration, errand matching, and communication.
- Gained insights into potential scalability challenges and future development considerations.
